PROJECTS

Netflix - Gain Proficiency in API's and React Made a Netflix clone using the Modern Framework React.js, using coding standards as well as having live search with Fuse and React routes (React router auth) with Firebase SDK for login. Tailwind was used for styling as well and TMBD API for grabbing movies and shows.

Interactive Three.js webpage

Combined the beauty of art with the functionality of coding to create a dynamic webpage using three.js, CSS and HTML. and JavaScript uploaded custom designs using blender.

Uber - React Native and Tailwind

An Uber clone using google's Directions, Distance Matrix, and places API. It utilized Redux, React Native, and tailwind to mimic the app known as Uber it was developed for iOS using React.
